820530 Set of glue brushes made from silicone

For not that big work pieces or edges. Easy application of glue to joints. One end of the brushes come with non flexibel glue spreader.

After the work is done, you simply pour excess glue back into the bottle and all tools can be easily cleaned.

2 brushes
 with 12 and 24 mm broad bristles
 bristles length 4 to 14 mm
 total length approx. 195 mm

glue brushes made from silicone

The round tip is ideal for putting glue into holes for dowels. With the broader, flexibel end you can put glue on small areas and joints.

These brushes come with all benefits of silicone brushes and can be used many times.

total length approx. 185 mm

820531 Set with 2 pcs

8205311 1 piece

820532 Glue spreders 6 pieces

Say goodbye to glue brushes by changing to these remarkable glue spreaders!

The 15 mm wide tip made of soft polypropylene is highly flexible. At 1 mm thick it's ideal for applying glue to small surfaces.

No need for subsequent rinsing, either, because the drying glue simply peels off the plastic instead of sticking to it.

Length 150 mm

820533 Set of glue brushes, tray and applicator made from silicone

For bigger work pieces and surfaces this set is best choice. The brushes, the applicator and the glue tray are best for applying greater quantity of glue on bigger surfaces. Otherwise, the glue spreaders on the other ends of the brushes can be used to apply glue to joints.

After the work is done, you simply pour excess glue back into the bottle and all tools can be easily cleaned.

clean with warm water or

let the glue dry and peel it right off

Contents

1 x glue tray

1 x glue applicator

2 x glue brushes (12 and 24 mm

bristles length 4 to 14 mm

totoal length approx. 195 mm)

820534 Set of glue pod & micro brush pack

These new type of brushes and glue pod are made from silicone and have a number of advantages. Glue can be applied easily. The brushes and pod are easy to clean.

The silicone rubber tips are perfect for a wide variety of applications and flex just enough to make apllying glue to smaller work pieces a breeze.

Remove the lid of the pod and pour in your glue. Glue pod holds about 60ml (2 ounces) of glue. Choose the right micro brush for your project and apply your glue. Use the lid as the perfect resting spot for your micro brushes and more!

The brushes and the pod can be cleaned easily. Non needed glue can be put back into the glue bottle.

clean with warm water or

let the glue dry and peel it right off

Contents

1 x glue pod

3 x micro brushes (length ea. approx. 145mm)

glue syringes

Whenever glue has to be applied in precise quantities or in hard to reach places such as cracks or loose wood connections it's time for glue syringes to show their mettle. Simply remove the red plastic cap with a vigorous tug, fill the glue in at the back and you're ready to go. When you've finished gluing, press the red cap firmly back on to stop the glue drying out. The red cap should snap on with an audible click.

Capacity 15 ml

Inside diameter of syringe 1.5 mm

Outside diameter of syringe 2.7 mm

Total length with cap 145 mm

820545 glue syringes Set with 5 piece

825451 glue syringe 1 piece

820546 High pressure glue syringe 20 ml

This glue syringe is for injecting glue at high pressure into cracks or loose wooden joints. If it is difficult, for example, to take a wobbly chair apart in order to glue it together again, then a viable alternative might be to drill a small hole in the region where glue is needed and to inject glue through this hole deep into the wooden joint.

Pick one of two brass tips with nozzle diameters of 1.6 and 0.8 mm to regulate the volume of glue you want to apply.

Hammer head drill with lace
